Lantech®

Case Handling • Stretch Wrapping • Tray & Lid Handling

End of line packaging machine manufacturer Lantech is widely recognized as the world leader in stretch wrapping technology as well as the producer of robust, efficient case and tray handling equipment. Founded in 1972, the US family-owned company developed the world's first stretch wrapper and has continuously improved this technology ever since. Built on innovation, customer support and the mission to dramatically reduce shipping damage globally, Lantech's 50+ years of industry knowledge can help you enhance your shipping operations.

Stretch Wrapping

Lantech's L-Series® stretch wrapping equipment creates, maintains and delivers safe to ship loads every time, reduces product damage and dramatically reduces film breaks.

L-Series Semi Automatic Stretch Wrappers:

The QL produces safe-to-ship loads quickly and easily for any load configuration. Standard with Pallet Grip®, this versatile machine comes in a small footprint and is available with many options including the EZ Weigh® Integrated Scale and Click-and-Go® Remote start.

QL400

Standard with Auto Film Cut-Off.
Up to 25-35 loads per hour.

QL400XT

Standard with XT Cut and Clamp® to keep drivers on fork trucks. Up to 30-40 loads per hour.

L-Series Full Automatic Stretch Wrappers:

Designed to handle a wide range of products and speed requirements these machines include our LeanWrap® Technologies to maximize productivity and performance while delivering safe-to-ship loads. Standard features include Metered Film Delivery®, Pallet Grip®, Load Seeking Clamp® 4.0 and Load Guardian™. Automatic Roll Change available on select models.

QL Automatic

Turntable stretch wrapper,
Up to 45 loads per hour.

SL Automatics

Straddle stretch wrapper,
Up to 90 loads per hour.

RL Automatic

Ring stretch wrapper,
Up to 180 loads per hour.
